

Nimba Mining Company Reaches a Historic Milestone with the Arrival of Its First Bauxite Train at the Port of Kamsar

Kamsar, December 13, 2025 – NIMBA MINING COMPANY S.A. (NMC) reached a major milestone this Saturday with the arrival of its very first bauxite train at the mineral port of Kamsar. This ceremony marks the effective launch of the company's rail transportation and bauxite export operations, just 100 days after its establishment.

This symbolic event confirms the full commissioning of Nimba Mining Company's integrated logistics chain, now fully operational from mining extraction through to maritime loading, demonstrating the rapid and well-controlled execution capacity of an ambitious Guinean company.

Remarkable performance in just 100 days

In only three months, Nimba Mining Company has achieved significant results:

- 600,000 tonnes of bauxite loaded
- Three boats loaded, with a fourth currently being loaded
- 460 employment contracts signed, contributing to local job creation
- Zero accidents, in strict compliance with health and safety standards

"This train represents far more than a means of transport. It symbolizes progress, technical mastery, and confidence in our collective ability to accelerate the industrial development of the entire region. Today marks a major turning point for our company: for the first time, our logistics chain is fully operational from extraction through to maritime loading," said Mr. Sékouba Doumbouya, Director of Rail and Port Operations at NMC.

A collective success serving national development and industrial transformation

This achievement is the result of the strong commitment and professionalism of teams across the mine, railway and port operations, as well as maintenance, safety, industrial security, environment, engineering and support functions. It has also benefited from the continuous support of Guinean authorities and technical partners.

Mr. Patrice L'Huillier, Chief Executive Officer of Nimba Mining Company S.A., highlighted the symbolic significance of this milestone, which coincides with the company's first 100 days of operation: "One hundred days of Nimba Mining Company S.A., one hundred days of success. We restarted bauxite loading, successfully resumed operations and recorded zero accidents, all while strictly adhering to health and safety standards. These results demonstrate that a 100% Guinean mining company can rapidly achieve the highest operational standards." He also noted that the effective restart of the mine is now imminent, opening a new phase of growth for both the company and Guinea's national mining sector.

As a Guinean company, Nimba Mining Company S.A. is fully aligned with the national ambition to enhance the value of domestic resources and advance industrial upgrading. Through the effective launch of its rail-based exports, NMC is strengthening its contribution to local and national economic development, while affirming the ambition of a high-performing, responsible and value-creating Guinean mining industry.

About Nimba Mining Company

Founded in 2025, Nimba Mining Company S.A. is a 100% Guinean-owned mining company held by a national holding dedicated to the extraction, processing, and valorization of Guinea's natural resources. The company operates the Tinguilinta mine, one of the country's largest bauxite deposits, and manages the Kamsar port facilities. NMC embodies a model of sovereign and sustainable governance, serving the economic and social development of the Republic of Guinea.
